

I.P.S. Gasketed Drainage (CL 160)

Injection Molded in Sizes 4" – 8"

Fabricated in Sizes 10" – 24"

Plastic Trends is one of the only manufacturers to supply 4" – 8" Gasketed Drainage (CL 160) fittings in molded components. These Gasketed Drainage (CL 160) fittings feature distinctive blue rings and gaskets for easy field identification.

Applications

Gasketed Drainage (CL 160) fittings are intended for non-pressure drainage of sewage and surface water where IPS pipe is specified.

Certifications

Plastic Trends Gasketed Drainage (CL 160) fittings are made to accept ASTM 2241 Class 160 pipe or ASTM 2665 DWV pipe.

Short Specs

4" through 8" Gasketed IPS Drainage fittings shall be injection molded or shall be assembled from injection molded components when possible. The fittings shall be made from PVC material that conforms to ASTM D1784 with a cell class of 12454. The body component fitting shall be manufactured in accordance with ASTM D2665, F2135, and CSA B181.2, as applicable. Minimum wall thickness shall meet or exceed the requirements of ASTM D2241, SDR26 (Class 160) and ASTM D2665 Schedule 40 DWV. Fitting gaskets shall be locked firmly in position to prevent displacement. Fittings shall have a blue color-coded gasket and gasket retaining ring for easy identification. Gasket joints shall be listed by NSF as meeting the requirements of ASTM D3212 in straight alignment, angular deflection and top load deflection for joint tightness at 200 PSI and vacuum at 22" mercury. Fittings shall also be certified to meet a 160 PSI pressure rating in accordance with Table X1.1 of ASTM D2241 and shall be listed by NSF for conformance to the performance requirements of ASTM D3139, section 8.1.1 at 160 PSI and vacuum at 22" mercury.

Fabricated fittings shall be made from Class 160 pressure pipe where applicable.

ATTENTION: Plastic Trends fittings are not to be used with compressed air or gases. Plastic Trends does not recommend that piping systems that include its products be tested with compressed air or gases.
