

**SLIKSTYX™ – SPRAY LUBE**

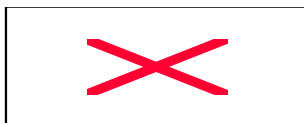

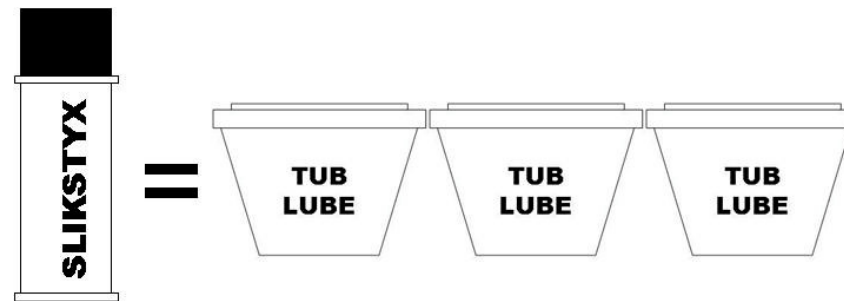

**Work Smarter with SLIKSTYX**

# What is it?

---

SLIKSTYX is the one and only spray on lubricant for push-together, gasketed pipe. This product can be used on any gasketed pipe and can be sprayed at any angle with just one hand. It is so superior than any wipe or brush on lube that one 16oz. Can of SLIKSTYX will go just as far as 4 Lbs or half a gallon of conventional wipe on lubricants!

## Why should I pay for lube? Isn't it free?

- This is a frequently asked question by people who have never used SLIKSTYX. Because lube does not appear on the bill it must be free right? This is simply not the case. Not only is lubricant cost figured into the price of pipe but there is rarely enough to go around. Contractors and installation crews do not like to run out of lube. That is why wholesale distributors carry a supply of pipe lube and we all know **it isn't free**.
- Would you believe that when pipe manufacturers ship lube they figure on a 30-50% waste factor and still it never seems to be enough?

# Save Money. Use SLIKSTYX.

- One 16oz. Can of SLIKSTYX will go just as far as 4 Lbs or half a gallon of conventional wipe on lubricants!
- The product is in a sealed system and cannot be spilled or contaminated by dirt falling in the bucket!
- It will not freeze and burst its container like the flimsy pails that wipe on lubes are shipped in!
- There is no brush/rag/glove needed to apply SLIKSTYX. Just point and spray.
- For larger jobs, keep in mind that our spray takes up about 1/4 of the space and weighs a fraction of what tubs of lubricant weigh.

# Safety is a factor

- One installer told us, "*When climbing in and out of the trench I don't want to lug a big, dirty, heavy and sometimes slippery pail of lube with me!*"
- The *Holster* clips right onto your belt or coveralls where it won't be in the way but is right there when you need it.

# A new level of efficiency

- SLIKSTYX has a 360° applicator that will empty in any position.
- The product has a bright golden color so that no one leaves a dry spot on the gasket.
- In light sub-aqueous conditions SLIKSTYX outperforms every lube on the market.
- Insertion force is not affected when using SLIKSTYX
- Drastically cuts the time required to lubricate a connection.

# Excellent record

---

- For more than a decade, smart pipe crews have been using SLIKSTYX™ instead of wipe-on lubes. Hundreds of thousands of connections are made each year using this product and in all those years and all those miles of pipe no pressure test failure has EVER been attributed to our spray-on lubricant.

# Summary

---

- SLIKSTYX helps your customer:
  - Work faster, more efficiently
  - Use one hand
  - Carry less weight
  - Avoid waste and contamination
- SLIKSTYX helps you:
  - Carry less product
  - Spend less on freight
  - Increase margins and drive sales with a unique product
