

<p style="text-align: center;">RIEBERLOK Features</p>	<p style="text-align: center;">RIEBERLOK Benefits</p>
<p style="text-align: center;">FEATURE</p>	<p style="text-align: center;">BENEFIT</p>
<p style="text-align: center;">RieberLok is an Internal Restraint</p>	<p style="text-align: center;">Eliminates external corrosion issues on steel harness components</p>
	<p style="text-align: center;">Eliminates Polywrap</p>
<p style="text-align: center;">RieberLok has the same Installation procedure as the pipe made with the standard rieber gasket</p>	<p style="text-align: center;">Reduces chance of installation error vs other internal restraints</p>
<p style="text-align: center;">RieberLok requires no change to the pipe manufacturing processes</p>	<p style="text-align: center;">No changing the production line to run a different bell shape</p>
	<p style="text-align: center;">Less expensive to produce than other internal restraints</p>
	<p style="text-align: center;">Less chance of quality issues</p>
<p style="text-align: center;">RieberLok requires no double inventory</p>	<p style="text-align: center;">Inventory of internally restrainable pipe in the market is increased because it's easier to inventory</p>
	<p style="text-align: center;">Less inventory carrying cost for the distributor</p>
<p style="text-align: center;">RieberLok saves significant labor over harnesses</p>	<p style="text-align: center;">Contractor has lower cost of variable labor and a low, fixed, cost of material</p>
	<p style="text-align: center;">Easier to keep installation schedule</p>
	<p style="text-align: center;">Saves money on total installed cost over all other restraints</p>
<p style="text-align: center;">RieberLok is the fastest and easiest way to Restrain C900 PVC pipe to pipe</p>	<p style="text-align: center;">Makes PVC Pipe easier to install.</p>
<p style="text-align: center;">The RieberLok Gasket can be installed outside of the ditch</p>	<p style="text-align: center;">Trench safety is GREATLY improved</p>
	<p style="text-align: center;">Opportunity for Installation error reduced</p>
	<p style="text-align: center;">Gasket can be installed while other pipe are being layed, which is not possible with harnesses</p>
<p style="text-align: center;">RieberLok is a proprietary Product</p>	<p style="text-align: center;">Faster and cleaner to install</p>
	<p style="text-align: center;">Quality control is more easily identifiable</p>
<p style="text-align: center;">RieberLok has only two components in the Manufacturing process vs four or more for harnesses.</p>	<p style="text-align: center;">Ransom is a proven and trusted company</p>
	<p style="text-align: center;">Quality control ownership is more easily identifiable</p>
	<p style="text-align: center;">Ownership in the manufacturing process is simplified</p>
