

RieberLok Warranty

Ransom International warrants that each RieberLok gasket will be free from defects in material and workmanship under conditions of normal use for twelve months from delivery as provided in Ransom International's Standard Terms and Conditions of Sale, which are hereby incorporated by reference and modified only as stated herein. If the gasket is properly installed in PVC pipe or fittings manufactured to AWWA C900 specifications, and originally fitted with a Rieber gasket, the RieberLok gasket is warranted against failure from either leaking or joint separation up to the rated pressure of the pipe or fitting provided. If a RieberLok gasket fails to meet the above-stated performance criteria, Ransom International will provide a replacement RieberLok gasket, pay the reasonable cost of the PVC pipe directly attached to the defective gasket, and pay the reasonable costs directly related to the removal of the defective gasket and the installation of the replacement. Removal and installation costs shall be based upon industry standard cost guidelines listed in the RS Means Assemblies Cost Data Book.
